

CREATIVE PORTFOLIO

BY: OWAIS ALI

CRMS

Hubspot

- Built Rev Intelligence pipeline — pulled live HubSpot deal and contact data via API into Looker Studio for revenue reporting
- Tracked SQLs MTD via Pulse Tracker using HubSpot as the source of truth against monthly targets
- Built and maintained automation workflows for lead routing, lifecycle stage progression, and follow-up sequences
- Configured multi-stage pipeline with deal setup, custom properties, and field mapping for GTM tracking
- Managed full lifecycle stages (Lead → MQL → SQL → Opportunity → Customer) with automated transitions and list segmentation

Core Areas

Contacts & Companies — Deals & Pipeline — Workflows & Automation — Custom Properties — Lead Scoring — Lists & Segmentation — API & Integrations — Lifecycle Management

Salesforce

- Built and maintained analytics dashboards for pipeline visibility and sales performance reporting
- Created and configured custom fields and objects aligned to business data requirements
- Cleaned, deduplicated, and managed CRM records across large enterprise accounts
- Set up and optimized sales pipeline stages with deal tracking and forecasting
- Built simple workflow automations for record updates, task creation, and lead assignment

Core Areas

Records & Data Management —
Pipeline & Forecasting — Custom
Fields & Objects — Workflows &
Automation — Dashboards & Reports

Airtable

- Set up bases, tables, and views tailored to team workflows and project tracking needs
- Built automation workflows for record updates, notifications, and triggered actions
- Configured calendars and list views for task and timeline management
- Set up integrations with external tools for data sync and cross-platform automation
- Managed relational data structures using linked records and lookup fields

Core Areas

Bases & Tables — Views & Calendars
— Workflow Automation —
Integrations — Linked Records —
Forms & Data Capture

GoHighLevel

- Built and customized frontend pages and funnels within GHL for client-facing lead capture
- Created and configured custom fields for contact and opportunity tracking
- Built and managed automation workflows for lead nurturing and follow-up sequences
- Set up and monitored analytics for funnel performance and conversion tracking
- Managed pipelines, contacts, and records across multiple sub-accounts

Core Areas

Funnel & Page Builder — Custom Fields — Workflows & Automation — Pipeline Management — Analytics & Reporting — Sub-account Management

Attio

- Work with object-based data model — People, Companies, Deals, and custom objects with relationship mapping
- Configure workspaces including custom attributes, field setup, and record structure
- Build lists, filters, and segments using Attio's query logic for targeted views
- Set up workflow automations for stage transitions, record updates, and triggered actions
- Build reports and dashboards for pipeline tracking and activity visibility

Core Areas

Objects & Records — Custom Attributes — Lists & Filtering — Workflows & Automation — Pipeline Setup — Reporting

Pipedrive

- Configure and manage deal pipelines with stage setup, probability tracking, and activity logging
- Set up contact and organization records with custom fields and data mapping
- Build workflow automations for deal progression, task creation, and notification triggers
- Use smart filters and segmentation for targeted outreach and list management
- Build reporting dashboards for pipeline forecasting and sales performance visibility

Core Areas

Deals & Pipeline — Contacts &
Organizations — Custom Fields —
Workflow Automation — Filters &
Segmentation — Reporting &
Forecasting

Marketo

- Understand lead lifecycle management and scoring models for MQL qualification
- Build and manage smart lists and segmentation using filter logic for targeted campaigns
- Set up email programs and nurture streams with trigger and batch campaign logic
- Configure forms and landing pages for lead capture and progressive profiling
- Work with reporting and analytics for campaign performance and engagement tracking

Core Areas

Lead Scoring & Lifecycle — Smart Lists & Segmentation — Email Programs & Nurture — Forms & Landing Pages — Campaign Analytics — CRM Sync

Zoho CRM

- Set up and managed automation workflows for lead assignment, follow-ups, and stage transitions
- Created custom fields and modules aligned to business data and pipeline requirements
- Built and configured forms for lead capture with field mapping to CRM records
- Manage contact, deal, and account records with data hygiene and deduplication
- Understand reporting, dashboards, and analytics for pipeline and activity visibility

Core Areas

Workflows & Automation — Custom Fields & Modules — Forms & Lead Capture — Records Management — Pipeline Setup — Reports & Dashboards

AUTOMATION

n8n

- Built Rev Intelligence workflow pulling live deal and contact data from HubSpot API into Google Sheets for Looker Studio reporting
- Built Upwork scraper workflow for automated job listing extraction and lead qualification
- Built LinkedIn + Website Hunter workflow for company enrichment using Serper and GPT-4 for AI-powered research
- Built Cleantech Series A leads finder — scraping newsletters and funding databases for verified pipeline leads
- Built multi-step automation workflows connecting HubSpot, Google Sheets, Apollo, and AI models for GTM data pipelines

Core Areas

API Integrations — HubSpot & CRM
Automation — Web Scraping — AI-powered Workflows — Google Sheets & Looker Studio Pipelines — Lead Enrichment & Qualification

Make (Integromat)

- Build multi-step scenarios connecting apps for data sync and workflow automation
- Set up triggers, filters, and routers for conditional logic across automation flows
- Use iterators and aggregators for processing bulk data and multi-record operations
- Connect Make to CRM tools for contact updates, deal creation, and pipeline management
- Comfortable with error handling, retry logic, and scenario monitoring for reliable automation

Core Areas

Scenarios & Modules — Triggers & Filters — Routers & Conditional Logic — Iterators & Aggregators — CRM Integrations — Error Handling

Zapier

- Built Zaps for Salesforce automation including record creation, field updates, and pipeline triggers
- Connected GHL to external tools for lead routing, contact sync, and follow-up automation
- Set up multi-step Zaps with filters, formatters, and conditional paths for data transformation
- Used Zapier as a lightweight integration layer between CRM and outreach tools
- Comfortable with Zapier Tables, triggers, and webhook-based automation for custom workflows

The Zapier logo is displayed in white lowercase letters on a solid orange rectangular background. The logo is centered horizontally and vertically within the orange area.

Core Areas

Multi-step Zaps — Salesforce Automation — GHL Integration — Filters & Formatters — Webhooks — CRM & Outreach Connectivity

LEAD ENRICHMENT

Apollo

- Used Apollo to enrich contact and company records with firmographic and contact data
- Integrated Apollo API with n8n to automate enrichment workflows as part of GTM data pipelines
- Built prospect lists using Apollo's search filters for ICP-based targeting
- Used sequencing and outreach features for email campaign setup and contact engagement
- Understand data export, field mapping, and syncing enriched records back to CRM

Core Areas

Contact & Company Enrichment —
API & n8n Integration — Prospect List
Building — Sequences & Outreach —
Data Export & CRM Sync — ICP
Filtering

Clay

- Build enrichment tables pulling data from multiple sources including Apollo, LinkedIn, and web scrapers
- Set up multi-step enrichment waterfalls to maximize contact data coverage
- Use AI columns for automated research, scoring, and personalization at scale
- Connect Clay to CRM and outreach tools for enriched record sync and campaign handoff
- Understand Clay's provider ecosystem and how to chain sources for complete lead profiles

Core Areas

Enrichment Tables & Waterfalls — AI Columns — Multi-source Data Pulling — CRM & Outreach Integration — Lead Research & Scoring — Provider Ecosystem

EMAIL AUTOMATION

Smartlead

- Set up and configured email accounts including warmup settings, sending limits, and deliverability setup
- Built campaign sequences with step logic, delays, and conditional follow-ups
- Managed lead lists, imports, and contact-level tracking across campaigns
- Monitored campaign analytics for open rates, reply rates, and bounce management
- Configured mailbox rotation and multi-inbox setup for high-volume outreach

Core Areas

Email Configuration & Warmup —
Campaign Sequences — Lead
Management — Mailbox Rotation —
Analytics & Deliverability

Instantly

- Set up sending accounts with warmup configuration and deliverability best practices
- Build and manage outreach campaigns with sequence steps and personalization variables
- Manage lead lists, upload contacts, and track reply and conversion activity
- Monitor campaign dashboards for performance metrics and inbox health
- Understand account rotation, sending schedules, and volume management for scale

Core Areas

Account Setup & Warmup —
Campaign Sequences — Lead Lists &
Imports — Personalization — Analytics
& Inbox Health — Sending
Configuration

WORKSPACE TOOL

Slack

- Manage channels, workspaces, and permissions for team communication and project organization
- Set up workflow automations and shortcuts for notifications and task triggers
- Integrate Slack with external tools for automated alerts and data pings
- Use Slack as a notification layer in n8n automation pipelines
- Comfortable with huddles, canvas docs, and thread-based async collaboration

Core Areas

Channels & Workspaces — Workflow Builder — Integrations & Alerts — n8n Notifications — Canvas & Collaboration

ClickUp

- Set up spaces, folders, and lists for structured project and task management
- Configure custom fields, statuses, and views for workflow visibility
- Build automations for task assignment, status updates, and deadline notifications
- Use dashboards and reporting for workload tracking and project progress
- Manage team tasks, priorities, and timelines across multiple projects

Core Areas

Spaces & Lists — Custom Fields & Views — Automations — Dashboards & Reporting — Task & Project Management

THANK YOU
